passable.

I have here tofore expressed my views as to the propriety of paying claims of this nature, which originate in the policion of the law on the part of the fremen, and, in the present case, even if the necessity for its violation was conspired as to render it excurable, there is no evidence to show that the oven was not improperly constructed, and might not have fallen in without the engine passing over it. I therefore return the papers for your consideration.

JAUUS A PREVEIT.

Which was directed to be entered at length on the minutes, and published in one or more of the public news-

minutes, and published in one or more of the public newspapers.

MAYON'S AFICE, Nov. 30, 1853.

Gentlemen—In accordation twelfth of the new acce with the provisions of section twelfth of the new acce with the provisions of section twelfth of the new acce with the provisions of section public of Constant and the public of Constant acceptance of the public of the public of Constant acceptance of the public of Const

Reperted to Committee on Labra and Flasses.

Of Committee on Repairs and Supplier, in favor of building a new Catharine Market. Adopted.

Resolution—That the com wharres, &c.

Resolution—That Samuel P. Jackson be reinstated in the Fire Department. To Committee on Fire Department. Resolution—That the Commissioner of Repairs and Supplies be directed to repair the drain connecting with the lewer in Third avenue, at Forty second street. Conjurred in.

Resolution—That the Compiroller be directed to advertise for proposals for the purchase a lot for Hose Company is To Committee on Fire Department.

Desolution—That the Commissioner of Repairs and Supplies be directed to place oil lamps in Fifth avenue of the corner of all the streets between Ferty second and the second of the second

of Nassan and Fulton streets. To Committee on Fire De

will be a great crowd. A popular farce is also to be represented.

Nimo's Garden.—Meyerbeer's grand opera "The Prophet," is to be given for the fourth time on Friday evening. The cast includes all the sitists Seats can be secured in the day time.

Bueron's Theatre—Bourcicault's successful comedy, 'The Fox Hunt,' is to be played again this evening Also, the 'Thousand Milliers.' Button appears in two of 'Les best characters.

National Theatre—His evening, Mr. Aiken's version of 'Uncle Tour's Cabin'' is announced. The piece seems as stractive as ever Wallack's Theatre.—This evening, 'A Care for the Hearlache,' and "More Blunders than One," are announced. The whole conipany appear in these pieces.

Barkyin's Museum and Mexageme.—This has got to be one of the features of our great thoroughfare. The 'siamese twins, the rhimocoros, and the home with their tamer, are worth a visit.

Bowarw Circus—A clever equestrian company are giving mightly exhibitions here. They appear this afternoon and evening.

Bilitz.—Stuyvesent Institute has been duly invested by Signor Elitz. He gives an entertainment this afternoon and evening.

Circustives—Plenty of fun and a nusement at the old place this week. The Chinese acrobats are capital Remember 472 Broadway.

Wood's Minstroit Hall.—The admirers of this band are in extacies with several new features. Go and see what they are.

"Norma," after Bellini, is now played every night by Buckley's minatrels, 639 Breadway. It is good, and there is a great deal more of good there too.

Ferram's Syven Mile Minkook is still on exhibition at 663 Broadway.

The Newark theatre is doing a good business. S. E.

Broadway.

The Newark theatre is doing a good business. S. E.

sa great deal more of good there too.

Primam's Savas Milk Misson is still on exhibition at 663
Broadway.

The Newark theatre is doing a good business. S. E.
Browne is stage manager.

M'le Julietts Borguese has made her debut at the French opera, New Orleans She is said to have a rich mean operan ovoice—flexible and of great compass.

John Dunn, comedian, artiga claver reconstruct, givas an "entertainment a la Matthews." at Westminster Hall, Providence this evening. The theatre (of which he was stage manager) was burned a few weeks since, and he was a sufferer.

From California papers up to the lat we extract the following:—

The American theatre has, during the past week, enjoyed a succession of good houses. Mr. Murdoch's benefit on Friday night was a perfect jam. He closed his engagement Saturday evening, which was his sixty fi st appearance in California. He appears in Sacramento.

The San Francisco, after having closed one night for the purpose of preparation an trebearsal, has produced a new attraction entitled "New York and San Francisco," It is an adaptation of Moncrie's play of "Paris and London." prepared by Mr. J. B. Booth.

The Olympic has been closed during the week, on account of the sickness of two of the company. It re-opened Saturday evening with a good house and a varied bill, for the besent of Meastrs. Dum ries and Rand.

The Enion theatic had a French performance last Sunday evening. The Acciphic continues its operatic entertainments on Sunday evenings. Madames Planel and Roncovier, and Meastra. Richer, Coulon, and Laglaize, are the principal performers.

Owing to the fred of the Musical Troppe gave only one concert during the last week. It was attended by an andience than filled the hall.

Lee and Marshall's Circus arrived yesterday morning from San Jose, and located on the lot adjoining the Clarendon Hotel, on Stockton street.

Mrs. Sinclair and Mr. E. Booth have been performing at Facramento City during the past week, with much an access.

The House of Priday evening.

Arrest of English Ladies—Dread of the Woman's Rights
Dectrine—The Case of Madame Silva—Her Connection
with the Lone Star Order—Inauguration of the Telegraph—
The American Samen in Prison.

Under the awful fear that Mrs. Brown, Mrs. Stowe, er
some other "woman's rights" article, is about to take
charge of the political condition of Cuba, we have seen the
powers occupied in causing the arrest of females upon
suspicion, or for the coercion of testimony gainst those
who have fallen under the dis pleasure of the government,
through the decunciation of the vile creatures, adjuncts
for the dirty work of the secret police, ready to use the
haife against the body, or to attain the integrity for puri
fication of the garote. fication of the garote.

Two English women were, sometime since, arrested

fication of the garce.

Two English women were, sometime since, arrested, and put in personal fear, for the purpose of extracting or extorting testimony which might be uset against a man now in prison waiting trial—a Mr. Delgado. What the offence is the prisoner and his friends are left to imagine; but they presume his having passed the summer in the United States—for business, recreation or health—has been the exciting cause, and that for this alone he will be held answerable under the grave charge of infidencial. These women are now permitted to remain at the residence of one of the relatives of the prisoner, who has given bonds that they shall be forthooming when required by the government to pass before the Queen's attorney or the Military Commusion.

Another lady has been also imprisoned, placed in a loathsome, dark cell, and left for two nights to rest upon the atone pavement, (being some five months advanced in pregnancy.) for being the wife of a Croole gentleman named Silva. a family well and favorably known in Havana, and in the country. She has since been placed in the especial custody of the administrador of the prison, or some high official of the institution, who is responsible for her safety. Madame Silva is to be tried for suspicious of having been a nember of the Lone Star Order of Old Fellows; or—but if will not affect to be wise in this matter, for I do not know for what the construction of this society, or what the object, unless associated with some great purpose of benevolence that may be entitled to the blessing of God.

On the 19th—Queen's Saint-day—I attended the cornerstone proceedings initiated by Canedo, for a new monument—not to the saint, but to the Queen—and all the other things of the day, in commemoration of our love and her exaited benedicence in permitting love, of which you have had such frequent details that the repetition is not necessary. The inauguration of the telegraph across the island from Havana to Botamanco was the most exciting part of the day's proceedings, and the

HAVANA, Nov. 22, 1863.
Yellow Fever in the Harbor of Havana—Ravages in American Ships—Death of Captain McKellar—The War Ship Buttard from England—More about the Celebrations, de.
The return of the United States mail steamship Falcon to this port—the having sustained some injury to her machinery—my first letter to the Herald being in her

mail bags, the departure this merning of the Isabel for Charleston, and as it was stated yesterday at the agent's of the Falcon that she would again depart this day, in-duces me to string together the few items of intelligence which I have gathered since the former departure of the

which I have gathered since the former departure of the Falcon for New York.

Yellow fever has been doing its dreadful work amongst the American vessels in this port, to an extent which those accustomed to its ravages call slight, but which appears to a man unaccustomed to see his fellow-men so hurriedly "carried off" as being "pretty considerably severs." I have heard of the decease of several American sailors, but happily only of one American captain, (Ms-kellar,) late of the bark Star, from some port—Rock-land, I believe—in Maine. His remains have been placed in a niche, so that bis family can, if they wish, have his

ashes restored to them. On the 18th inst. the British war steamship Buzzard Cap

place:-

TELEGRAPHIC

ARRIVAL OF THE FALCON AT CHARLESTON. CHARLESTON Nov. 29 1853.
The steamship Falcon, which left Havana on the 23d instant for New York, put in here tast night for fuel.

She had experienced heavy weather.

There is no political news of interest. On the 22d in tant a favorite Spanish actress, attached to the Tacon theatre, was murdered by her husband, who afterwards killed Limself. Cause, infidelity. The affair had created onsiderable excitement.

The carpenter shop of Nathan W. Walton was de stroyed by fire at Richmond on the 25th ultimo. Loss \$3 000.

FINANCIAL AND COMMERCIAL.

MONEY MARKET.

WEDNESDAY, Nov. 30-6 P. M. At the opening to day the tendency of prices was down ward. In the leading farcies the operations were to some extent, mostly on time. We notice a larger business than usual in railroad bonds but at lower prices. At the first board to-day New York Ceptral bonds declined her per cent; Michigan Central Railroad 1/4; Hudson River Rail-road 1; Reading Railroad 1/4; Erie Railroad 1/4; New York Central Railroad 1/4; Nicaragua 1/4; Morris Canal ¼; Parker Vein ¾; Canton Co. ¾; Gold Hill ¼. All others closed at yesterday's prices. These fluctuations in the stock market show the unsettled state of financia affat s, and bow difficult it is, under existing circum stances, to predict any future movement in such uncer tain securities. Even the sound, substantial investment of the day are likely to be seriously depreciated before the expiration of the approaching winter. The fancies, these spirals at the approaching winter. The fancies, these which actually come under the head, are destined to touch comparatively very low points. They have not within themselves the slightest sustaining power, and we know of no cutside influence strong enough to overcome the natural tendency of such securities. It requires the strongest rerver, and the most desperate propensity for gambling, to invest capital in such stocks as are daily operated in at the board; but they always have found purchasers, and we suppose they always will. In buying them a man must be governed by an idea similar to that which induces one to try the chances of roulette. The probability of making money is just about as gool in one as the other.

The steamship Arabia, from this port for Liverpool

to-day carried out \$621,121 in specie. There was an active demand for sterling exchange up to the close of the market. The ruling quotations were 9% a 10 per cent premium.

The receipts at the office of the Assistant Treasurer of

The receipts at the office of the Assistant Treasurer of this port to-day, amounted to \$115 5:3 18; paid, \$491,554 93—leaving a balance of \$4,847,551 66.

The Governor of South Carolina, is his message to the Legislature of that State, says:—The funded debt, on the lat ult., amounted to \$1870,986, and the assets to \$5,175,542. Je recommends a subscription of \$750,000 for the Riue Ridge Railroad, the establishment of a Board of Education, and the appointment of Commussioners of Public Instruction. Public Instruction.

After the adjournment of the board, the following sales

of stocks were made at anotion, by A. H. Muller;-

More than two thirds of the aggregate value of mer-chandise exported was composed of breadatuffs. The out-ward movement of cotton continues limited. In other

ward movement of cotton continues limited. In other things about the usual variety of shipments were made. The dry goods trade manifests no new feature of importance. The supply of seasonable fabrics is moderate, but the demand is equally limited, and prices of most articles are barely sustained. The preparations for the spring business are carried on with great viger, and will be consummated ere long. The new year's advent cannot fail to be accompanied by a general revival of trade. Brown sheetings and shirtings are rather plentier, and but sparingly sought after yet seem pretty firm. Bleached sheetings and shirtings remain inactive and unaltered Cotton fiannels are becoming more abundant, yet appear in slack request at languid rates. Woollen pra ductions display very little animation. The fall season is about over, and the spring campaign has not as yet been entered upon. The desirable stock is very small and commands full prices; other kinds are partially neglected. Blankets are in less request, but rather scarce and firm. Cassimeres are in good supply and slack demand, at drooping rates. Cloths are dull and heavy, being pretty freely offered, in the absence of buvers. Flannels have not varied. Lineaps are still wanted by jobbers, at 20c. a 22c. All the well known mouslin de laines are saleable and buoyant. Satinets remain as last noticed. Shawls are in light supply and firm in prices. The inquiry for them is, however, less animated. There has been a fair business done in tweeds, at steady quotations.

At a public dinner given to Gen Rusk, United States of merchandise exported from this port during the week ending and including Saturday, November 26, distin-guishing the destination and extent of shipments to each | COMMERCE OF THE PORT OF New YORK—WERKLY EXPORTS. LIVERPOOL. | Quantity. Value. | Quantity. | Quantity.

At a public dinner given to Gen Rusk, United States Senator, at Austin, Texas, on the 5th inst., which was largely attended by members of the Legi-lature, and prominent citizens from all parts of the State, he gave his opinions at large on the subject of the Pacific rail oad. He thus aketches his plan for the building of the road:—

prominent citizens from all parts of the State, he gave his opinions at large on the subject of the Pacific rail oad. He thus sketches his plan for the building of the road:—

Texas has no accumulated capital, nothing to invest; but she has a vast amount of unappropriated lands of im nerse value, out of which he majsh find the means of establishing connections with such other States as have means and funds. There are 800 miles within Texas of the line of the most favored route. Mr. Rusk then suggests that the State should grant twenty sections of land to the mile to a company contracting for the building of the read, with authority to connect with other routes, not cesignating any particular starting print on the east, but rilpulating that it should not regin north of a particular point, but night commence anywhere south of it in the State. That policy will give those who are willing to invest capital a chance to examine and satisfy them selves of the least starting point and route; it will bring those at the end of that route, the connective points with other roads, to terms, in order to secure the advantages of the connection. He proposes that the company should be required to deposit \$200,000 in the Treasury of the State to be forfeited in case a certain length of road is not finished within a year, and a forfeiture of the charter and the road finished and the State might require reletting to another company, if a cartain length of the road should not be finished, yearly, until the whole was completed. There terms, he thinks, would not be onerous to bond fide contractors who have the means, and intend in good faith to build the road, and not make a speculation by the sale of privileges. The amount of public land in Texas is 102,747,000 acres, and the appropriation he recommends would repaire 10,240 000 acres. He considers that the gain in the increased value of the reaves the best for national defence. It would, moreover, create the necessity and the means for connecting San Diego with San Francisco by a coa

				A new invention, which is destined to some notociete

in much lighter in body, and the servey time much digrams in color, than that produced by the Pennsylvania and Lehigh Company.

A new invention, which is destined to some notoristy, has been recently patented by Richard Montgomery. It is called 'Patent corrugated boiler plate,' and consists in substituting waved or furrowed plates for plain ones. To understand its nature one requires to examine the specimens and see their practical application. It will suffice here to say that, without additional expense, the use of Mentgomery's patent adds strength, and surface for heat. A plate which, when plane, can be bent with the hand, acquires when corrugated enough strength to support a ton weight. Boilers built of corrugated plates will coempy considerably less space than those now in use, and their cost will be twenty five per cent less. No stays will be required, and explosions will be impossible. The new invention will fikewise be very serviceable for shutters, &c. We shall fallude to it again. The President of the company which has purchased the patent is Joseph Belk-rap, of the Phoenix Foundry.

MINING BOARD, NOV. 30.

MINING BOARD, NOV. 30.

CITY TRADE REPORT.

WEDNISDAY, Nev. 30—6 P. M.

ASHES.—The day's sales reached 100 barrels, at \$6 50 a \$5 56½ for pearls; and \$5 50 for pots, per 100 lbs.

BRAINFUTES.—Flour was in very fair request, both for the home trade and far export, but at rather easier prices. The day's operations embraced 20,000 barrels, at \$6 83½; ordinary to choice State, at \$5 81½ a \$7; mixed to fancy Western, at \$6 87½ as \$7 12½; and other grades at proportionate figures. About 700 barrels Canadian changed hands, at \$7 per bbl. The transactions in Southern amounted to 20 000 bbls, at steady quotations. No change occurred in rye flour or corn meal. Wheat was less active, and less valuable—the day's movements consisted of 17,500 bushels fair to very good Genesee white, at \$1.70 a \$1.75, 15 000 ordinary to choice Michigan do. at \$1.83 a \$1.72; 6,000 fair Canadian do. in bond, at \$1.85 a \$1.72; 6,000 fair Canadian do. in bond, at \$1.85 as 1.60,000 western red at \$1.56 a \$1.55. Some 17,000 bushels rye were at ld at \$1 per bushel. State and Western cate were less sought after at 50c a \$3%c. Corn varied little—the day's business included 30,000 bushels at 70s. a 80c. for unsound, 80c. a \$25c. for mixed Southern and Western, with \$1½ c. a \$2½ c. for round white and yellow per bushel.

Correx.—Sales were make of 2,450 bales, including 500 for export, 641 for home use, and 1,220 for speculation Market easier only for Upland.

FEH.—Dry cod were very quiet at \$3.25 a \$3.37½ per cwt. Mackerel ruled scarce and somewhat nominal. Sales have been made of 200 bbls pickled herring at \$4 per bbl., and 12,500 boxes amoked do. at 36c, for No. 1, and 55c. a 58c, for scaled, per box.

FRUIT.—The sales of the day were confined to 500 boxes dry bunch raisins, at \$3.20; and 1,000 boxes were dried do. at \$2.70 a \$2.75.

FRUIT.—The sales of the day were confined to 500 boxes dry bunch raisins, at \$3.20; and 1,000 boxes were engaged, at 25 d. for Scaled, per box.

FRUIT.—The sales of the day were confined to 500 boxes dry bunch raisins, at \$3.20; and 1,000 boxe

er houseau.

Land.—Some fifty tons Spanish were seld on private terms.

Link.—The last sales of Rockland were effected at \$1, for comman, and \$1.27\for a \$1.30c, for lump, per barrel.!

MOLESSE —About 75 hhds. Porto Rico changed hands at 28c, per gallon.

Naval Storks.—Nothing rew occurred in crude turesmitne; sales were made of 400 barrels spirits do at \$7c, thirty and sixty days; and 1,000 barrels common resin at \$1.80.

Chis —Whale, sperm, and olive remained about the same; rome 4,000 gallons linseed found buyers at previous figures.

Provisions —Pork tended downwards. The day's sales embraced 700 bbls, Western, at \$13.50 for mess, and \$11 for prime, per bbl. The sales of new cut meats reached 140 hhds pickled shoulders and hams, at 7c and 10c, a 10\for respectively, per lb. About 320 pkgs. common to prime lard were bought, at 9\forall c. a 10c, per lb. Beef did not vary much, some 400 bbst. were sold at yesterday's prices: 60 tierces old prime mess beef were procured, at \$16.50. We have no new feature to report in other articles.
